OFFICIAL RULES & REGULATIONS

HACK RULES

Read carefully. Compete fairly. Build something unforgettable.

⏱ 24-HOUR SPRINT | 5 SECTIONS | 2 TRACKS | NO EXCEPTIONS

01 — APPLIES TO EVERYONE

General Conduct

⌨️

CODE WINDOW

All code must be written **during the 24-hour event**. No pre-written functional code of any kind.

📦

LIBRARIES & APIS

Usage of **open-source libraries and public APIs** is fully permitted. Build on the shoulders of giants.

🎒

YOUR GEAR

Bring your own **laptops, chargers, and extension cords**. We provide the space — you bring the power.

02 — TRACK ONE

Idea-Based Track

The Builders

You have the vision. Now make it real.

💡 IDEA-BASED

01 / **FRESH START**

Initialize a brand new GitHub/GitLab repo at T-00:00. The clock starts, and so does your codebase.

02 / **PRE-WORK ALLOWED**

UI mockups and architecture diagrams are welcome. But zero functional code from previous projects may be carried in. ✓ Wireframes & Diagrams OK

03 / **OUTCOME REQUIRED**

A working prototype or MVP is required by the end of the 24th hour. Concepts without code don't cross the finish line.

03 — TRACK TWO

Problem Statement Track

The Solvers

You don't pick the problem. The problem picks you.

🧩 PROBLEM-BASED

01 / **THE REVEAL**

Problem statements are released exactly at the start of the event. No previews, no hints, no leaks.

02 / **SELECTION WINDOW**

Your team has 60 minutes to review the problem(s) and lock in your approach. Once committed, there's no switching. ⏱ 60-min window

03 / **CONSTRAINTS FIRST**

Scoring is weighted heavily on how accurately you solve the specific constraints provided. Polish matters less than precision.

04 — FINAL STEPS

Submission & Judging

GIT HISTORY

Commit history will be reviewed. Massive copy-paste code dumps are a red flag and will lead to disqualification. Commit early, commit often.

THE PITCH

You get 3 minutes to demo your project, followed by a 2-minute Q&A. Make every second count.

⚠ HARD DEADLINE

Submissions close at the designated time. The portal locks — no grace period, no extensions, no exceptions.

```
Submission Deadline: TBA _
```

JUDGING CRITERIA

Judges evaluate on technical execution, problem fit, originality, and presentation. Track 2 weighs constraint alignment above all.

05 — BEFORE THE EVENT

Registration

REGISTER ONLINE — ONLY ON WEBSITE

indianexthackathon.online

REGISTRATION CLOSES

11 March 2026 — 23:59:59

⚠ Registrations are accepted **exclusively through the website**. Walk-in or on-site registrations will not be entertained.

💡 IDEA-BASED TRACK

WHAT TO SUBMIT

- GitHub profile link — for identification purposes only
- A brief description of your idea
- No prototype or MVP required at registration

> ⚠ The idea must be original and not previously built. You'll develop the full MVP during the 24-hour window.

🧩 PROBLEM-BASED TRACK

WHAT TO SUBMIT

- GitHub profile link — for identification purposes only
- No idea, MVP, or prototype needed
- Problem statements revealed at event start

> ℹ Come ready to think on your feet. Your only prep is your team and your skills.

Keep it clean. Keep it innovative.

May the best compilers win 💻
